Subject: Pebble report

Bob,

Good talking with you last night. The Pebble report I mentioned is at the following links:

http://www.northerndynastyminerals.com/ndm/Prelim_A.asp

<http://www.northerndynastyminerals.com/ndm/NewsReleases.asp?ReportID=444069&Type=News-Releases&Title=Northern-Dynasty-Receive-Positive-Preliminary-Assessment-Technical-Report...>

The first is a one-page summary, the second about 20 pages with more detail.

Regards, Rod

Hi Folks,

First, thanks to those of you who have already submitted your manuscripts.

For the rest of you, I would like to set a **deadline**. I will be back in the office from a trip on **Monday April 11**. It would be great to have your papers by then (earlier is fine too). Let me know if you have a problem meeting this deadline.

As far as manuscript preparation, I have attached a fairly recent paper in Economic Geology that you can use for formatting guidance to streamline the remainder of the process.

I have had a few questions about figures and other aspects of the volume.

1. Color should be available, but we need to use it sparingly. In other words, if you can avoid color, please do. Once I have a better sense of the actual number of papers and their titles, I plan to start approaching sponsors to help offset the cost of printing. If you know of any companies, or other organizations that may be

interested, let me know.

2. For use of figures published and copyrighted elsewhere, the SEG publication office wants the authors to get permission from the original publisher.

3. The volume will initially be published in hard copy, and either simultaneously, or shortly there after published digitally.

I look forward to hearing from you. Let me know if you have any questions.

Bob
